

## Special Issue

# Diagnosis and Personalized Management of Endometriosis

### Message from the Guest Editors

Endometriosis is a chronic inflammatory disease that leads to pain and infertility, and occurs primarily in women of reproductive age. Endometriosis has a significant impact on women's health and health care costs. Endometriosis affects 6–10% of reproductive-aged women and more than 175 million women worldwide. Most women with endometriosis suffer physically and emotionally in their day-to-day function. Despite current research efforts, diagnosis and treatment options remain lacking. The number of surgeries performed for endometriosis worldwide is ever increasing; thus, measuring the magnitude of the effect of surgery is of the utmost importance in order to define a therapeutic balance between benefits, harms and costs in various clinical conditions. We aim to present a selection of papers in this Special Issue that will focus on the optimum diagnostic techniques employed to treat this disease, as well as novel therapeutic approaches. We welcome you to submit original papers, reviews, and perspectives on the challenges present and information available with regard to cutting-edge endometriosis diagnosis and treatment.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
