

Special Issue

Personalized Diagnostics and Therapeutics in Otolaryngology

Message from the Guest Editors

Advances in personalized medicine are transforming the landscape of modern healthcare, offering the potential to tailor diagnosis, treatment, and rehabilitation strategies to each individual patient. In the field of otolaryngology, where clinical presentations and therapeutic responses can vary widely among individuals, the promise of precision medicine is particularly compelling. This Special Issue, "Personalized Diagnostics and Therapeutics in Otolaryngology", invites high-quality contributions that highlight innovative approaches to individualized patient care across all subspecialties within the field. From the integration of clinical genomics, molecular diagnostics, and artificial intelligence to the development of targeted therapies and personalized rehabilitation protocols, we seek to explore how cutting-edge science is reshaping patient outcomes in disorders such as head and neck cancer, tinnitus, vestibular dysfunction, and sensorineural hearing loss. We welcome original research articles, clinical studies, comprehensive reviews, and perspectives that address both clinical applications and foundational research.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
