Exploring Precision Medicine in Endocrine Disorders, Metabolic Diseases and Electrolyte Imbalance

Message from the Guest Editor

Endocrine disorders, metabolic diseases, and electrolyte imbalance have led to growing numbers of patients in recent years. Due to the intricate regulation of hormone secretion and substance metabolism in the human body, the system disturbance varies in each patient most of the time. Precision medicine has provided innovative approaches for accurate diagnosis, outcome prediction, and personalized treatment based on individual factors. To date, the understanding of precision medicine in the field of endocrine and metabolic diseases is limited. This Special Issue aims to explore individualized medical strategies or novel perspectives that involve disorders or syndromes with hormone and/or substance imbalance. We welcome original research and reviews that cover, but are not limited to, the following potential sub-topics and methods:

- Newly identified cause or risk factors, differential diagnosis or subtyping, interpretation of atypical symptoms, evaluation of treatment effect, etc.
- We especially encourage the submission of interdisciplinary works and multi-country collaborative research. We welcome the submission of solid research articles/communications or review papers.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
