

## Special Issue

# Personalized Ophthalmology: Optometry and Treatment

### Message from the Guest Editor

The main objective of this Special Issue is to improve the accuracy of diagnosis and the effectiveness of treatment, adapting them to the individual needs of each patient, considering genetic, environmental, and lifestyle factors. The scope of personalized optometry encompasses precise diagnosis, with advanced technologies; personalized therapies, adapting treatments according to the characteristics of the patients; and prevention and monitoring, with preventive strategies and monitoring programs adapted to risk groups.

---

### Guest Editor

Dr. Concepción De-Hita-Cantalejo

Department of Physics of Condensed Matter, Optics Area, University of Seville, 41004 Seville, Spain

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
