Special Issue

Inborn Errors of Metabolism: From Pathomechanisms to Treatment

Message from the Guest Editors

We are pleased to invite you to submit your research to our new Special Issue, "Inborn Errors of Metabolism: From Pathomechanisms to Treatment", which will focus on recent advances in the molecular and cellular mechanisms of inborn errors of metabolism (IEMs) and novel therapeutic approaches. We invite researchers in this field to submit original research and review articles on IEMs, including, but not limited to, studies on molecular and cellular mechanisms, organelleorganelle and cell-cell interaction alterations, multiomics approaches, bioinformatics, biomarker discovery and implementation, and the development of new in vitro and in vivo models. In addition, studies involving therapeutic alternatives such as cell modulators (i.e., immunomodulators, antioxidants, and biogenesis inductors), as well as gene therapy alternatives, will be considered.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
