

Special Issue

Novel Therapies and Approaches to Scoliosis and Other Spinal Disorders

Message from the Guest Editor

Emerging technologies and newly developed procedures employed in the correction and/or restoration of spinal disorders require that we continuously update our international knowledge base regarding novel therapies and approaches that may enhance our collective understanding of the correction and/or restoration of spinal deformities and disorders. Moving forward, modalities that improve spine function must be personalized to address individual functional needs and tailored for sustainable surgical and/or non-operative spinal outcomes. Increasing the bandwidth and diagnosis-specific granularity of spinal care requires a platform to foster genuine interest via effective, expert evidence-based and practicable experience. The aim and scope of this Special Issue is therefore to drive innovation in the advancement of real-world solutions for spinal disorders.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
