

## Special Issue

# Retinal Diseases: Mechanisms, Diagnosis and Treatments

### Message from the Guest Editors

In recent years, we have faced huge improvements and tremendous challenges regarding both medical and surgical approaches in several retinal diseases. Genetic treatments have already been employed in patients with inherited retinal disorders (IRD). These developments have opened a promising pathway for new research in gene editing for managing retinitis pigmentosa (RP), Stargardt disease, Leber congenital amaurosis (LCA), cone rod dystrophy, and so on. Retinal diagnosis higher speed scanning systems provide us with impressive opportunities to understand the mechanisms of the diseases of interest. The surgical treatment of different retinal pathologies represents another area of continuous improvement. The purpose of this Special Issue is to discuss matters associated with new concepts in the diagnosis and treatment of retinal diseases. The scope of this Special Issue is deliberately broad to encourage the coverage of a wide range of topics and perspectives related to the mechanisms of retinal diseases that are newly revealed by state-of-the-art diagnostic tools and related to promising therapeutic approaches in this field through original contributions or reviews.

### Guest Editors

Prof. Dr. Horia T. Stanca

Department of Ophthalmology, "Carol Davila" University of Medicine and Pharmacy, Bucharest, Romania

Prof. Dr. Mihnea Munteanu

Department of Ophthalmology, "Victor Babes" University of Medicine and Pharmacy, 300041 Timisoara, Romania

### Deadline for manuscript submissions

25 May 2026

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
