

Special Issue

Personalized Medicine for Gastrointestinal Diseases

Message from the Guest Editors

This Special Issue aims to compile a diverse selection of papers focused on the pathophysiology, diagnosis, and treatment of gastrointestinal diseases. This includes research on new molecular mechanisms, innovative endoscopic and surgical techniques, differential diagnosis methods, diagnostic models, improvements in diagnostic procedures, advancements in endoscopic and surgical treatments, and the utilization of artificial intelligence in the field of gastrointestinal diseases. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Precision medicine for the prevention, prognosis, diagnosis, and differential diagnosis of gastrointestinal diseases.
- Personalized medicine for the medical treatment of gastrointestinal diseases.
- Advances in molecular medicine on gastrointestinal diseases.
- Clinical application of personalized medicine for the diagnosis and treatment of gastrointestinal diseases.
- Novel techniques in the diagnosis and treatment (e.g., pharmaceutical, interventional, and surgical) of gastrointestinal diseases.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
