Special Issue

Personalized Medicine in Dermatology: Current Status and Challenges

Message from the Guest Editors

Personalized medicine is transforming dermatology by moving from generalized treatments to tailored approaches based on individual clinical, genetic, and lifestyle profiles. This is especially important in chronic inflammatory conditions such as psoriasis, acne, and hidradenitis suppurativa, where patient variability is considerable.

This Special Issue aims to explore the current landscape and future of personalized medicine in dermatology. We seek to highlight how precision strategies can improve therapeutic outcomes, reduce side effects, and enhance patient quality of life. Advancements in biotechnology, pharmacogenomics, and digital health are driving more accurate diagnoses, treatment monitoring, and customized care, paving the way for truly patient-centered dermatology. We welcome original research, reviews, and clinical perspectives on personalized dermatology. Relevant topics include biomarkers, treatment algorithms, targeted therapies, digital tools, patient-reported outcomes, and real-world applications of precision

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
