Orthopedic Trauma: New Perspectives and Innovative Techniques

Message from the Guest Editors

We are pleased to announce the Special Issue "Orthopedic Trauma: New Perspectives and Innovative Techniques," which aims to spotlight the latest advancements and methodologies in the field of orthopedic trauma. With continuous progress in medical research and technology, new techniques and approaches in trauma care have emerged. We invite the submission of high-quality studies, including original research and reviews, that explore the full spectrum of orthopedic trauma, from acute management to post-operative rehabilitation. We are particularly interested in contributions that cover the latest trends in trauma care, including innovative surgical techniques, cutting-edge interventions, non-operative treatments, treatment protocols, patient outcomes, and potential complications associated with these treatments, along with their possible management. By contributing to this Special Issue, you will help expand the body of knowledge in orthopedic trauma and encourage the exchange of valuable insights within the scientific community. We look forward to your contributions and to collectively advancing the field of orthopedic trauma care.

Guest Editors

Dr. Roberto Bevoni
Dr. Silvio Caravelli
Dr. Massimiliano Mosca

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
