

## Special Issue

# Personalized Oncology in Gastrointestinal Cancer: Emerging Therapies and Challenges

### Message from the Guest Editor

This Special Issue will mainly focus on analyzing present and future approaches for the treatment of gastrointestinal (GI) cancer patients, with a glimpse into novel perspectives and future challenges in clinical practice. GI cancers are one of the most common worldwide cause of cancer-related death. They include a wide spectrum of neoplasms, including esophageal, gastric, hepatic, biliary, pancreatic, small bowel and large bowel as well as rectal cancers. In the last decade, significant improvements have been made in the prognosis of patients affected by these tumors thanks to the development of new treatments, which include cytotoxic drugs, targeted therapies, and immunotherapy. Recently, emerging and novel biomarkers have been identified and validated with a huge impact on patients' outcomes and improving the treatment landscape. Despite these advances, GI cancers still represent a major public health problem worldwide; hence, it is mandatory to develop novel therapeutic approaches. We cordially invite experts in the field to submit original research or review articles to better understand and explore this important topic.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
