

## Special Issue

# Current Status and Future Research in Infectious Diseases' Treatment and Prophylaxis

### Message from the Guest Editor

Over the years, viruses have proven that they can be unpredictable, but bacteria, parasites, and fungi can also take us by surprise. Global efforts have targeted prevention, and in some cases met with success: on the 29th of March 2023, the World Health Organization announced that a total of 42 countries or territories have reached the malaria-free milestone; however, there is much to be done in regard to cholera epidemics, monkeypox outbreaks, the prevalence of tuberculosis, the emergence of new multidrug-resistant fungi, such as *Candida auris*, and many more. The Special Issue is to discuss the current status of and future research in infectious diseases. Prophylaxis is usually the first approach, but when this is no longer possible, we must treat them. We welcome original articles and reviews providing new research data on infectious diseases irrespective of the etiology—bacterial, viral, parasitic, or mycotic—as well as on infectious diseases' current statuses and future research, prophylaxis, and treatment.

### Guest Editor

Dr. Loredana Sabina Cornelia Manolescu

1. Clinical Laboratory of Medical Microbiology, Marius Nasta Institute of Pneumology, 050159 Bucharest, Romania
2. Department of Microbiology, Parasitology and Virology, Faculty of Midwives and Nursing, Carol Davila University of Medicine and Pharmacy, 020021 Bucharest, Romania

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
