Glaucoma Management in the Era of Personalized Medicine

Message from the Guest Editor

Glaucoma care has evolved tremendously in recent years. Advances in imaging techniques, a better understanding of aqueous humour dynamics or novel biomarkers are just a few examples. We can now tailor the diagnosis, progression monitoring and the medical and surgical treatment to the individual patient to a much greater extent than we were able to just a few years ago. Therefore, I am delighted to be the of this Special Issue on the topic of glaucoma management in the era of personalized medicine. Renowned experts in the field contribute an up-to-date review of their area of expertise. I am confident that this Special Issue will be of great value to clinicians as well as scientists as a go-to reference for up-to-date personalized glaucoma care.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
