

Special Issue

Advances in Personalized Medicine for Cardiovascular Care

Message from the Guest Editor

This Special Issue is dedicated to “Advances in Personalized Medicine for Cardiovascular Care”, focusing on the transformative role that personalized approaches can play in the diagnosis, management, and treatment of cardiovascular diseases. Conventional modalities including imaging techniques and pharmacotherapy continue to be invaluable; however, personalized medicine has introduced an unparalleled depth of patient-specific care. Groundbreaking technologies such as artificial intelligence, augmented reality, and digital twins are enabling clinicians to predict disease patterns, tailor treatments, and even simulate surgical outcomes before intervention. Moreover, advances in genomics are helping to identify individual predispositions to cardiovascular diseases, allowing for early, targeted interventions. This Issue invites submissions that delve into both the traditional and Personalized approaches in cardiovascular medicine.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
