

## Special Issue

# State-of-the-Art in Precision Medicine of Plastic Surgery

### Message from the Guest Editors

Over the years, the concept of 'variability' as applied to medicine has expanded disproportionately, which has added complexity, to an already highly articulated picture. In plastic surgery, more than in other fields, the indication and quality of surgery depend on the surgeon's experience and potential surgical pathways related to health and disease status, also influenced by personal history and different environmental exposures. This is why even in the third millennium, plastic surgery remains an art that is practiced by making judgments and decisions, based on information that is far from complete. Although personalized care increasingly attracts the attention of various stakeholders, there is no shortage of critical issues. We invite you to submit papers to enhance knowledge regarding the application of new surgical techniques in the field of reconstructive and cosmetic surgery, turning our gaze to the much sought-after Precision Medicine.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
