

Special Issue

Clinical Diagnosis and Treatment of Gastrointestinal Diseases

Message from the Guest Editors

We invite you to contribute to this Special Issue. The aim is to collect a broad range of papers related to the diagnosis and treatment of gastrointestinal diseases, including the development of new endoscopic techniques, differential diagnosis, diagnostic models, refinement of diagnostic procedures, advances in endoscopic treatment, etc. The topics for the section include, but are not limited to, the following:

- Clinical diagnosis and differential diagnosis of gastrointestinal diseases (including the esophagus, stomach, small intestine, and colon), pancreatobiliary diseases, and liver diseases.
- Medical treatment of gastrointestinal diseases (including the esophagus, stomach, small intestine, and colon), pancreatobiliary diseases, and liver diseases.
- Advances in endoscopic retrograde cholangiopancreatography treatment.
- Clinical application of endoscopic ultrasound in gastrointestinal disease.
- New insights into or techniques of natural orifice transluminal endoscopic surgery.
- New epidemiological data that result in the improvement of the diagnosis and treatment of GI diseases.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
