

Special Issue

Personalized Medicine in ENT and AI

Message from the Guest Editor

ENT is rapidly evolving toward precision care, driven by rich multimodal clinical data—including endoscopy, imaging, audiology/vestibular testing, voice analysis, genomics, and patient-reported outcomes—together with the growing maturity of clinically deployable AI. This Special Issue highlights validated, clinically meaningful AI approaches that enhance diagnosis, risk stratification, treatment selection, surgical planning, and follow-up, while also addressing bias, safety, privacy, and real-world implementation. We welcome original research, systematic reviews/meta-analyses, reproducible technical reports, and implementation or health-economics studies relevant to AI-enabled personalized ENT care. Before full submission, authors are encouraged to share a tentative title and a 3–5-line abstract for discussion. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2026).
