Recent Research on Personalized Approaches to Clinical Therapeutics and Medication Safety

Message from the Guest Editor

Recent research has placed a greater emphasis on the importance of a personalized approach to improve patient outcomes in the fields of clinical therapeutics and medication safety. This Special Issue focuses on the most recent research and developments in the fields of clinical therapeutics and medication safety from a personalized perspective. We invite contributions that explore the practical application of personalized pharmacotherapy in clinical settings, the identification of patient-specific factors that influence medication efficacy and safety, and innovative strategies to mitigate actual medicine-related harm (e.g., adverse drug reactions). These contributions will enhance our knowledge in the broader discussion on personalized healthcare and inform future clinical practices.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
