

Special Issue

Precision Medicine in Head and Neck Cancer

Message from the Guest Editor

We cordially invite you to submit your original research and review articles for an upcoming Special Issue of the *Journal of Personalized Medicine*, focused on "Precision Medicine in Head and Neck Cancer". This Special Issue aims to report on the latest advancements and breakthroughs in the field, highlighting innovative diagnostic and therapeutic approaches. Monoclonal antibodies for treating head and neck cancer, as well as applications of artificial intelligence and large language models to assist in cancer diagnosis, treatment, and patient care, are the most widely known developments towards personalized medicine in head and neck oncology. However, these are just a few examples, and we welcome a diverse range of topics related to personalized medicine in head and neck cancer. We look forward to receiving your valuable contributions to this Special Issue and to advancing our collective understanding of personalized medicine in head and neck cancer.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
