

## Special Issue

# Pathophysiology of Retinopathy in Precision Medicine Era

### Message from the Guest Editors

Sight in humans is the primary sense for the perception of the surrounding environment and social relationships. Central to the process of vision is the retina, a light-sensing tissue that lines the back of the eye, which converts light signals into electric signals that the brain finally interprets as vision. Retinal diseases, the leading causes of vision loss and blindness, are associated with complicated pathogeneses such as angiogenesis, inflammation, immune regulation, fibrous proliferation, and neurodegeneration. This Special Issue aims to broaden the knowledge of the physiology together with diagnostic and therapeutic methods that may be used in the treatment of retinopathy. Original articles and reviews highlighting progresses regarding its novel treatment and mechanisms will be welcome.

---

### Guest Editors

Dr. Luís Guilherme Arneiro Mendes

AIBILI—Association for Innovation and Biomedical Research on Light and Image, 3000-548 Coimbra, Portugal

Dr. Daniela Ferrara

Department of Ophthalmology, Tufts University School of Medicine, Boston, MA, USA

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
