Special Issue

Otorhinolaryngology (Head and Neck Surgery): Personalized Diagnostics and Therapy

Message from the Guest Editor

Otorhinolaryngology (head and neck surgery), focusing on ear, nose, and throat (ENT) disorders, is a field that has significantly benefited from advances in personalized medicine. Initially, the management of ENT disorders relied heavily on broad-spectrum medications and invasive surgical procedures with variable outcomes. The introduction of genomic medicine, improved imaging techniques, and advanced surgical technologies have transformed the landscape. The Special Issue aims to explore and disseminate cutting-edge research that highlights the shift towards personalized care in the field of otorhinolaryngology. This Special Issue seeks to foster a deeper understanding of how personalized approaches can be effectively implemented in otorhinolaryngology, aiming to enhance patient outcomes through more tailored and precise medical care. By featuring a mix of research articles, reviews, and case studies, this issue aims to be a valuable resource for clinicians, researchers, and healthcare professionals committed to advancing the field of personalized medicine in otorhinolaryngology. Original research, review articles, and communications are welcomed.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
