

# Special Issue

## Advances in Robotic Neurorehabilitation

### Message from the Guest Editor

This Special Issue aims to bring together a diverse contributions, ranging from fundamental research to clinical applications, with a focus on how robotic technologies are augmenting and optimizing neurorehabilitation interventions. These devices, ranging from exoskeletons to wearable sensors and VR tools, are providing targeted and personalized interventions for individuals recovering from different neurological impairments. Additionally, the aim of this Special Issue is to provide an overview of the possibilities and advancements in different aspects in the field of robotic neurorehabilitation, including the preclinical and clinical testing of novel machines and tools for robotic neurorehabilitation.

Authors are also encouraged to submit their technical notes, clinical outcome studies, patient satisfaction studies, and systematic reviews and meta-analyses for various robotic interventions. Case series and case reports of high quality will be considered for publication.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.
