

Special Issue

Advances in Robotic Neurorehabilitation

Message from the Guest Editor

This Special Issue aims to bring together a diverse contributions, ranging from fundamental research to clinical applications, with a focus on how robotic technologies are augmenting and optimizing neurorehabilitation interventions. These devices, ranging from exoskeletons to wearable sensors and VR tools, are providing targeted and personalized interventions for individuals recovering from different neurological impairments. Additionally, the aim of this Special Issue is to provide an overview of the possibilities and advancements in different aspects in the field of robotic neurorehabilitation, including the preclinical and clinical testing of novel machines and tools for robotic neurorehabilitation.

Authors are also encouraged to submit their technical notes, clinical outcome studies, patient satisfaction studies, and systematic reviews and meta-analyses for various robotic interventions. Case series and case reports of high quality will be considered for publication.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
