

Special Issue

Interventional Cardiology and Personalized Medicine

Message from the Guest Editors

The Special Issue will cover a broad range of clinical applications in the field of acute and chronic coronary artery disease and structural heart pathology. We are particularly interested in how real-world data from registries is informing the use of personalized therapies in minimally invasive procedures, such as transcatheter aortic valve replacement (TAVR), percutaneous coronary interventions (PCI), and left atrial appendage closure (LAAC). The insights derived from such large-scale datasets have the potential to refine clinical guidelines and improve decision-making in these rapidly evolving areas of cardiovascular care. We aim to showcase how leveraging registries and large databases can lead to more accurate risk stratification, enhance procedural planning, and support better post-procedure monitoring, all with the ultimate goal of improving patient outcomes. We invite original research articles, reviews, and other types.

Guest Editors

Prof. Dr. Arnoud W. J. van 't Hof
Dr. Pieter A. Vriesendorp
Dr. Árpád Lux

Deadline for manuscript submissions

25 October 2026

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
