Recent Advances in Dental Practice

Message from the Guest Editors

The next level of reliability and efficiency of digital processes in dentistry needs to be put to the scientific test. Optical impression taking using state-of-the-art scanning techniques, as the linchpin of digitization, has a decisive impact on productivity and growth. Are patient engagement and shorter treatment time with higher esthetics in line with personalized medicine? Do multi-platform systems deliver on their promise of predictable and long-term treatment outcomes? Are plug-and-play solutions in the practice still future-proof, or is support from remote teams the new game-changer? Let us answer these questions together with well-founded scientific studies. Clinical as well as laboratory research is most welcome. I look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
