Special Issue

Clinical Research of Minimally Invasive Spine Surgery

Message from the Guest Editors

This Special Issue aims to highlight the latest clinical research in minimally invasive spine surgery, exploring new techniques, outcomes, and challenges in the field. We seek to provide a comprehensive overview of current trends, future directions, and the impact of MISS on patient care and recovery. Topics of interest include, but are not limited to, the development of new minimally invasive surgical techniques, comparative studies of MISS versus traditional surgery, advancements in imaging and navigation tools, patient selection criteria, and long-term outcomes. We encourage submissions that showcase innovative research in MISS, including clinical trials, comparative effectiveness research, technological advancements (e.g., robotics, navigation systems), and novel approaches to patient care and rehabilitation. This includes, but is not limited to, studies on surgical techniques, outcome measures, patient safety, and quality of life assessments. Research that provides insights into the mechanisms underlying the benefits of minimally invasive approaches and their impact on surgical outcomes is particularly welcome. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
