Special Issue

Novel Challenges and Advances in Respiratory Diseases

Message from the Guest Editor

This Special Issue, entitled "Novel Challenges and Advances in Respiratory Diseases", aims to offer a comprehensive exploration of the latest research and advancements in the field of respiratory medicine. With a particular focus on innovative approaches, breakthrough treatments, and cutting-edge technologies, this issue aims to shed light on the diverse spectrum of respiratory conditions and their management strategies. From investigating novel therapeutic interventions to elucidating the underlying mechanisms of respiratory diseases, the articles in this Special Issue provide valuable insights into understanding, diagnosing, and treating various pulmonary disorders. Additionally, given the unprecedented challenges posed by emerging pathogens like COVID-19, this issue also addresses the impact of such global health crises on respiratory health and healthcare systems. By covering topics such as immunotherapy, precision medicine, respiratory infections, and airway diseases, this Special Issue serves as a valuable resource for researchers, clinicians, and policymakers striving to advance the field of respiratory medicine and improve patient outcomes.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
