

## Special Issue

# Personalized Therapeutics and Drug Development of Liver Disease

### Message from the Guest Editors

As , I am pleased to invite submissions to our Special Issue on "Personalized Therapeutics and Drug Development of Liver Disease." This Special Issue seeks to explore the cutting-edge advancements in personalized medicine and drug development specifically tailored to liver diseases, including non-alcoholic fatty liver disease (NAFLD), metabolic dysfunction-associated steatotic liver disease (MASLD), viral hepatitis, liver fibrosis, and hepatocellular carcinoma (HCC). We welcome original research articles, reviews, and other types that contribute to the growing body of knowledge in this dynamic field. Submissions should emphasize the translational aspect of research, bridging the gap between bench and bedside, to offer new hope for patients suffering from liver diseases. We look forward to your contributions that will shape the future of personalized medicine in hepatology.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
