

Special Issue

New Approaches in Pharmacogenomics

Message from the Guest Editor

Suitable topics include drug- and disease-specific pharmacogenomic testing methods, user-friendly decision support tools/software for personalized medicine, collaborative data between genomic experts and healthcare providers, biomarkers for predicting treatment outcomes, innovative treatment approaches based on pharmacogenomics, innovative medical education programs/experiences, and research on integrating pharmacogenomics into clinical practice. In addition, authors are encouraged to submit novel findings on the biological function of genetic variants and their association with disease. Suitable papers include original research, reviews, and updated overviews of pharmacogenetics and pharmacogenomics.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
