Pharmacokinetics and Pharmacodynamics in Personalized Medicine

Message from the Guest Editor

The success of personalized medicine depends on accurate diagnostic tests with individual pharmacokinetic (PK) and pharmacodynamics (PD) characteristics. PK and PD are the two main principles determining the relationship between dose and response. PK helps to determine the dose–response relationship in individual clinical efficacy and drug toxicity. PD is used to measure the clinical outcomes. Due to individual differences, variations in the PD response become more profound. PK/PD modelling is the discipline establishing quantitative links between PK and PD fundamental features. New drugs and old drugs with narrow therapeutic windows and higher toxicities usually need PK, PD, and PK/PD studies. These old drugs include, but are not limit to antibiotics, immunosuppressants, cardiovascular drugs, and psychotropic drugs.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
