

Special Issue

Emergency Medicine: Clinical Advances and Challenges in Diagnosis and Treatment, 2nd Edition

Message from the Guest Editor

I am pleased to announce that, due to the success of the first edition of the Special Issue “Emergency Medicine: Clinical Advances and Challenges in Diagnosis and Treatment”, we have launched a second edition in 2024 for high-quality submissions in the Personalized Critical Care Section. The main objective of this edition is to acquire the most valuable information regarding the newest approaches in the diagnosis and treatment of emergency care patients that will create new perspectives on patient management through various case reports. This second edition aims to collect and welcome articles from adjacent areas of acute care, such as intensive care, pre-hospital care, acute stroke care, health services research, and implementation research. Our goal is to improve the quality of care by publishing high-quality research for emergency medicine and related specialties, focusing on original research, reviews, and case reports to bring valuable educational information related to emergency medicine practice, teaching, and research.

Guest Editor

Prof. Dr. Ovidiu Alexandru Mederle

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
