Personalized Diagnosis and Treatment of Heart Failure

Message from the Guest Editor

Heart failure (HF) is a highly prevalent clinical syndrome with serious morbidity and mortality. Acute heart failure (AHF) is the main cause of hospital admission for people aged 65 years or older. In this particular population, even when adhering to clinical guidelines for treatment, other comorbid conditions should be taken into consideration. Thus, treatment should be discussed individually with patients, accounting for both the actual recommendations and personalized medical approaches, such as genetic predispositions, individual responsiveness to treatments, and lifestyle modifications. We seek original articles and reviews that not only cover the latest advancements in standard treatment protocols but also emphasize the importance of integrating personalized medicine in the management of HF to improve patient outcomes and quality of life.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
