

Special Issue

Targeted Immunotherapy in Cancer

Message from the Guest Editor

Cancer immunotherapy is a revolutionary approach in the field of cancer treatment that harnesses the power of the immune system to fight cancer cells. It represents a significant paradigm shift from traditional cancer treatments such as surgery, chemotherapy, and radiation therapy. While cancer immunotherapy has shown remarkable success in treating certain types of cancer, it is important to acknowledge the challenges and limitations that present specifically and effectively, particularly in targeting cancer cells. This Special Issue aims to provide a comprehensive overview of the latest advancements and emerging trends in targeted cancer immunotherapy. We welcome original research articles, reviews, and perspective articles on this theme. Topics may include, but are not limited to:

- Novel technology to deliver immunotherapeutics to target locations.
- On-off switch for CAR-T cell therapy.
- Providing cancer-targeting moiety to immunotherapeutics.
- Immunotherapy-related toxicities and management.
- Translational research in cancer immunotherapy using an advanced animal model.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
