Cardiac Disease in Pregnancy: Diagnosis, Management and Outcomes

Message from the Guest Editor

Cardiovascular disease is a major cause of nonobstetric maternal morbidity and mortality, with increasing prevalence over the last two decades. It affects close to 1% of pregnancies in the developed world and 4% in the developing world. Although rheumatic heart disease comprises the most common maternal cardiac disease in the developing world. congenital heart disease is the most common maternal cardiac disease in the Western world. Optimal care for pregnant patients is best delivered by a multidisciplinary team which includes specialties such as cardiologists. maternal-fetal medicine specialists, anesthesiologists, geneticists, cardiovascular interventionalists and cardiac surgeons. The increased prevalence has led to the development and growth of the cardio-obstetrics field and related clinics worldwide.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
