Mental Health: Diagnosis, Therapeutic Intervention and Patient Management in the Era of Personalized Medicine

Message from the Guest Editors

The Special Issue, entitled "Mental Health: Diagnosis, Therapeutic Intervention and Patient Management in the Era of Personalized Medicine", welcomes you to participate in the ongoing and never-ending research regarding matters of mental health. The field of mental health is experiencing significant changes, necessitating creative clinical approaches and adaptable patient care methods to address evolving psychosocial requirements. Over time, psychiatric practices have transitioned from institutionalized care to patient-centric models that incorporate diverse viewpoints and evidence-based practices. This Special Issue seeks to investigate contemporary paradigms of personalized diagnosis and patient management in mental health environments, emphasizing therapeutic techniques, clinical decision-making, and holistic treatment models. We are seeking original research papers and reviews that explore innovative patient management strategies, therapeutic approaches, implementation methods, and policy insights in relation to mental health.
