Advancements in Minimally Invasive Urological Surgery and Endourology

Message from the Guest Editor

The past 15 years have seen tremendous advancement in the field of urinary and male genital system surgery. The miniaturization of surgical devices, the introduction of the Da-Vinci robotic system as well as the recruitment of holmium/neodymium lasers for the improvement of surgical outcomes have all led to a significant increase in surgical volumes in general and in organ-preserving surgeries in particular. Thanks to a parallel advancement in the anesthesiology field, cases considered for conservative treatment in the past are now eligible for surgical treatment if they meet the appropriate indications. This Special Issue of *Journal of Personalized Medicine* will focus on advancements in minimally invasive urological surgery and endourology. Authors are welcome to submit their original research and review articles on laparoscopic and robotic surgery of the prostate, kidney, ureter and urinary bladder, as well as the surgical treatment of nephrolithiasis and benign prostatic enlargement.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
