

Special Issue

Personalized Geriatric Medicine

Message from the Guest Editors

Personalised care is an established key concept in geriatric medicine clinical practice. Given that older adults often have multiple overlapping physical diseases, cognitive impairment, psychological disorders and bespoke social care needs, it is not a surprise that geriatricians are primed to follow the path of tailoring treatment to the individual. This Special Issue aims to disseminate current research that targets improvements in personalised prescribing practice, particularly those improvements that lead to a reduction in adverse medication harms, and subsequently enhance the personal autonomy and dignity of older adults. Whilst the primary focus of this Special Issue is medicine optimisation, we strongly encourage researchers to contribute to this Special Issue and share novel approaches to other clinical conundrums within geriatric medicine care.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2026).
