

## Special Issue

# Artificial Intelligence in Diagnosis, Treatment and Prognosis of Cardiovascular Diseases

### Message from the Guest Editor

Artificial intelligence (AI) refers to the development of computer systems capable of performing tasks that typically require human intelligence, such as recognizing speech, making decisions, and solving problems. Cutting-edge research in artificial intelligence (AI) is driving innovations in areas such as natural language processing, computer vision, and autonomous systems, significantly enhancing capabilities across various industries and clinical applications that help in disease diagnosis, prognosis and decision-making in management plans.

This Special Issue will focus on groundbreaking advancements in artificial intelligence, featuring cutting-edge research and innovative applications across the field of cardiovascular care. We welcome submissions of reviews and articles using AI-enabled programs.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
