

## Special Issue

# Personalized Medicine in Infectious Diseases

### Message from the Guest Editors

The aim and scope of this Special Issue encompass the application of personalized medicine in infectious diseases. It highlights cutting-edge research that is transforming the treatment and management of infectious diseases through personalized approaches. We are particularly interested in research conducted using new methodological approaches and techniques as well as bioinformatics tools, including big data analysis. **We sincerely invite and warmly welcome scholars in this field to actively submit articles and contribute to the rich content and academic value of this special issue.**

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
