# Innovative and Future Trends in Personalized Medicine for Retinal Diseases

### Message from the Guest Editor

Personalized medicine is rapidly transforming the landscape of retinal disease management, offering the potential for tailored treatments based on an individual's unique genetic and molecular profile. By integrating genomic, epigenomic, and proteomic data, clinicians can gain a deeper understanding of disease mechanisms and tailor therapeutic strategies to an individual's specific needs. The scope of personalized medicine extends beyond therapeutic interventions to encompass preventative strategies, identifying individuals at risk, and implementing preemptive measures to mitigate disease onset or progression. Recent advancements in areas such as imaging technologies, DNA sequencing, gene therapy, and stem cell biology have propelled clinical trials and rapidly changed the therapeutic outlook for retinal diseases. We invite authors to contribute manuscripts that focus on notable advancements in the combined use of cutting-edge diagnostic techniques and targeted treatment strategies for retinal disorders. We aim to enhance our understanding of the complexities associated with personalized medicine in this challenging field.

### Guest Editor

Dr. Joanna Dolar-Szczasny

Department of General and Pediatric Ophthalmology, Medical University of Lublin, 20-093 Lublin, Poland

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
