

Special Issue

Personalized Medicine for Autism Spectrum Disorder

Message from the Guest Editor

Autism spectrum disorder presents in a highly heterogeneous manner. This includes but is not limited to co-occurring conditions that most individuals with autism are diagnosed with. Given this large variability in how autism presents, approaches that are tailored towards individuals are essential. This Special Issue seeks contributions that focus on approaches for diagnosis, classification, treatment, or management of individuals with autism spectrum disorder. Papers involving clinical trials are welcome as are computational/theoretical studies which are based upon real data. Of special interest are contributions which specifically address challenges related to the heterogeneity that exist in ASD as well as the effect of environmental factors on ASD.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
