

## Special Issue

# Personalized Medicine for Autism Spectrum Disorder

### Message from the Guest Editor

Autism spectrum disorder presents in a highly heterogeneous manner. This includes but is not limited to co-occurring conditions that most individuals with autism are diagnosed with. Given this large variability in how autism presents, approaches that are tailored towards individuals are essential. This Special Issue seeks contributions that focus on approaches for diagnosis, classification, treatment, or management of individuals with autism spectrum disorder. Papers involving clinical trials are welcome as are computational/theoretical studies which are based upon real data. Of special interest are contributions which specifically address challenges related to the heterogeneity that exist in ASD as well as the effect of environmental factors on ASD.

### Guest Editor

Prof. Dr. Juergen Hahn

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
