

## Special Issue

# Clinical Progress of Diabetic Foot

### Message from the Guest Editors

Diabetic foot complications remain one of the most significant challenges in diabetes care, with high rates of morbidity and amputation. This Special Issue explores the latest clinical advances in the management of diabetic foot disease, emphasizing the role of personalized medicine. Advances in biomarker identification and individualized treatment strategies are transforming clinical approaches, enabling tailored interventions that address the unique needs of each patient. However, integrating personalized treatment strategies into clinical practice remains an emerging challenge. This issue aims to provide a comprehensive overview of how personalized care is improving the prognosis and quality of life for individuals with diabetic foot complications. We invite contributions related to original studies and literature reviews that discuss novel diagnostic tools, cutting-edge therapies, and the integration of personalized medicine in preventing, managing, and treating diabetic foot ulcers and infections.

### Guest Editors

Dr. Piergiorgio Francia

Dr. Roberto Anichini

Dr. Leonardo Bocchi

Dr. Alessandra De Bellis

### Deadline for manuscript submissions

31 July 2026

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
