Personalized Medicine in Benign and Malignant Adrenal Tumors

Message from the Guest Editors

Adrenocortical carcinoma is a rare endocrine tumor characterized by a grim prognosis, a strong propensity to recur after surgery, and a limited range of available therapeutic options. Therefore, great efforts are required to identify reliable prognostic factors, novel methods to secure early diagnosis and new markers for a timely detection of tumor recurrence following adrenalectomy. Given that the available medical therapies have limited efficacy and are quite toxic, the identification of new molecular targets that can be druggable and the development of innovative therapeutic agents is a definitive priority to improve patient care. In the meanwhile, studies focusing on the efficacy and safety of existing therapies, as well as on quality of life, should be promoted. This Special Issue will focus on all of these aspects, in particular on genetic, new “omics” markers, differential diagnosis, prognostic factors, as well as therapeutic approaches and their effects. Both original research and review articles are welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
