Special Issue

New Advances in Treatment of Sepsis

Message from the Guest Editor

Sepsis is now defined as an organ dysfunction caused by an overwhelming and life-threatening host response to infection. Excessive inflammatory response in sepsis subsequently leads to multiple organ dysfunction syndrome due to vascular endothelial dysfunction. coagulation disorders, alterations in cell function, and dysregulated cardiovascular responses. Despite the progress made in medical management over the past few decades, sepsis remains an important global health problem, with approximately 11 million sepsis-related deaths reported in 2017. Although various strategies to control sepsis-induced inflammation and organ dysfunction have been evaluated over the past several decades, there is still no proven therapeutic intervention benefitting survival. Therefore, updating knowledge on the pathophysiology of sepsis is a vitally important issue to construct a novel therapeutic strategy of sepsis. In this Special Issue of the Journal of Personalized *Medicine*, we will discuss the etiology, pathophysiology, clinical manifestations, diagnostic, and optimal management to treat critically ill patients with sepsis.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
