Special Issue

Application of Microbiome in Disease Diagnosis and Treatment

Message from the Guest Editors

There is currently growing research into the impact of the gut microbiome on human homeostasis and how its alteration may influence the development of certain diseases via the gut-brain axis. Determining the levels of certain intestinal strains in diseases is becoming of great diagnostic value in the clinic, especially through 16S ribosomal RNA (rRNA) gene sequencing, quantitative polymerase chain reaction (qPCR), metabolomics, and metagenomic sequencing. The information provided by these analyses is extensive, including relative and absolute abundance, diversity, and microbial richness that can support diagnosis. Different strategies based on bidirectional communication between microbiota and brain can be used to restore the affected gut microbiota such as probiotics, prebiotics, and recently fecal microbiota transplantation. Thus, their use appears to have beneficial effects on individuals with autism, obesity, anxiety, depression, and hepatic encephalopathy. We thank you for considering this invitation and are available for any inquiries.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
