Atherosclerosis: Technologies of Personalized Medicine

Message from the Guest Editor

The worldwide prevalence of atherosclerosis and associated diseases is growing on an epidemic scale. Early detection of atherosclerotic changes requires modern molecular genetic, biochemical, pathophysiological, and equipment studies that enable personalized approaches to treatments. Personalized medicine includes a range of approaches to health care based on factual data: from precise molecular diagnostics to prediction of the onset or development of disease based on genetic research. We invite you to submit papers with the results of research on atherosclerosis aimed at improving technologies for the prevention, diagnosis, risk assessment, and treatment of atherosclerosis from the standpoint of personalized medicine. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2026).
