

## Special Issue

# Clinical Application of Personalized Genomic Medicine

### Message from the Guest Editor

The aim of this Special Issue is to present current best practices, emerging areas of development, and informatics approaches in applying personalized genomic medicine into the clinical environment. We are inviting the submission of original articles and reviews for this Special Issue. Articles may be focused on (though not limited to) the clinical application of: bioinformatics, phenotype-based approaches to diagnostic sequencing, genomic screening, polygenic risk scores, risk alleles and low penetrance variants, genomic-based blood typing, integrative reporting, and return of genomic results, including applications and methods communicating with the HER.
