Special Issue

Personalized Therapeutic Strategies in Gastrointestinal Surgery

Message from the Guest Editor

Key areas of focus in this Special Issue include the integration of genomic profiling in surgical planning, the role of minimally invasive techniques and robotic surgery in personalized treatment, and the impact of novel biomarkers on predicting surgical outcomes. By bringing together leading experts in the field, this Special Issue aims to provide a comprehensive overview of the current state of personalized therapeutic approaches in gastrointestinal oncologic surgery. Through original research articles and reviews, we hope to highlight the potential of personalized strategies to revolutionize surgical oncology and set the stage for future innovations that will continue to advance patient care.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
