

Special Issue

Precision Medicine for Hematological Malignancies

Message from the Guest Editors

The field of malignant hematology has been on the precipice of advancements in precision medicine. This Special Issue highlights cutting-edge research and clinical advances in myeloid malignancies, lymphoid neoplasms, plasma cell dyscrasias, and hematopoietic stem cell transplantation. The scope of topics in this Special Issue includes genomic profiling, targeted therapies, biomarker-driven treatment approaches, and novel immune targets and immunotherapeutic agents, as well as studies evaluating novel risk stratification and prognostic factors. Original research papers are encouraged; however, meta-analyses and topic reviews will also be considered for publication.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
